

Foot Safety Checklist				
Location/Department:		Date of Inspection:		
Inspectors:				
Corrective Actions: Work order/memos were issued: <input type="checkbox"/> Yes <input type="checkbox"/> No Date issued:				
The following safety and health checklist may not include <i>all</i> conditions, as it is intended to be used only as a guide.				
Topic Description	Yes	No	N/A	Comments
Are approved safety shoes or boots worn to protect feet and toes from:				
Falling objects				
Punctures				
Rolling objects or crushing				
Stubbing or banging				
Chemical or corrosive contact				
Electrical shock or burns				
Slips or falls				
Is footwear selected to protect against specific job hazards, such as:				
Steel toes or non-metallic safety toe to resist impact				
Metatarsal guards to resist impact above and to the rear of the toes				
Reinforced flexible metal soles or inner shoes to protect against punctures (if there's no risk of electrical contact)				
"EH" footwear for electrical hazards				
Footwear with slip-resistant soles for wet or slippery surfaces				
Heat-protective footwear for hot walking surfaces				
Protection from hot metal splashes or sparks if needed				

Static-dissipative footwear for use in electronically sensitive areas				
	Yes	No	N/A	Comments
Appropriate chemical-resistant boots in areas with potential chemical or corrosive exposures (check Material Safety Data Sheets to match footwear with individual chemical)				
Are general foot safety rules followed?				
Always wear sturdy footwear with nonskid soles				
Don't wear sandals, sneakers, or old dress shoes				
Get a good fit
